

INVICTUS TECHNICAL SOLUTIONS

INNOVATION STARTS HERE

Who We Are

Invictus Technical Solutions (ITS) LLC is a Service Disabled, Veteran Owned Small Business (SDVOSB). We are an Information Technology services company with in depth experience in all areas of IT support services and added expertise in unique areas such as: Unmanned Aerial Systems (UAS); Medical IT; Logistics/warehouse operations; Network and Access Security; IT Architecture Planning and Projects and; Joint Test and Evaluation (JT&E).

Mission

Solve our Customers' Immediate and Strategic Challenges Through Unparalleled and Affordable Technical and Operational Support Services

Vision

We strive to be the most sought after small business provider for government customers and contractors who require consistent, exceptional Technical and Operational Support services.

Information Technology

ITS was founded as an Information Technology company and most of our business continues to be based in this core competency. Our expertise spans all aspects of IT with detailed experience in general IT services as well as some very unique areas of IT support. We have expertise in typical IT from Help Desk and Administration but also perform Cyber Defense and Project Planning. Our most unique skills are our capabilities around Medical Applications, Full Cryptographic control and both Facility and Special Security (FSO and SSO) support.

- o **General IT Services**
 - IT management and administration on networks classified up to TS/SCI
 - Network monitoring and management
 - 24/7 Operation Center and Facility support
- o **Medical IT Applications Support**
 - DHIMS, EHR, AFHLTA and MedCOI
- o **Architecture Planning Services**
 - IT Project Development and Management
 - Obsolescence tracking and prediction
- o **Security Services**
 - ISSO/ISSM support
 - Cryptographic Material handling and controls
 - Contractor Special Security Officer Support
 - Facility Security Officer Support
- o **Logistics and Warehousing**
 - Expert users of Integrated Maintenance Data System (IMDS)
 - Implementation of IT Asset Management Software (iTAMS)
 - Hazmat Processing and Handling

INNOVATION STARTS HERE

Unmanned/Remote Piloted Aircraft Systems

While Information Technology is the core competency of our company, support to the UAS/RPA community is our core passion. From the very start, ITS has supported the UAS/RPA systems and community. This experience spans all aspects of IT support, operations, testing as well as scheduling of training and airspace and airspace use coordination.

- o Full Motion Video (FMV) architecture
 - Long haul communication support
 - Video Dissemination Hub support (VDH)
 - Video and Audio Distribution support
- o Unmanned/Remote Piloted Aircraft Expertise
 - Operational Expertise
 - Network/Communications Expertise
 - Airspace and Scheduling
- o Architecture Planning Services
 - IT Project Development and Management
 - Obsolescence tracking and prediction
- o Airspace and Training Scheduling
 - Airspace Reservation with Central Scheduling Enterprise (CSE)
 - Scheduling for Airspace and Training with Patriot Excalibur (PEX)

- o Medical Support
 - Logistics and Property accountability
 - Architecture Planning/Program Support
- o Warehousing support
 - Create and operate IT warehousing at central and remote locations
 - Integrated Maintenance Data System (IMDS)
 - Implementation of IT Asset Management Software (iTAMS)
- o Logistics Support
 - Plan, develop, acquire and sustain materiel support strategies
 - New system logistics strategy development
 - Hazardous Materials process and handling
 - Property management control

Logistics and Warehousing

In addition to general accountability, required on all government contracts, ITS provides a full range of logistics support. We offer full warehouse development and operation and are expert users of both Integrated Maintenance Data System (IMDS) and IT Asset Management Software (iTAMS)

Joint Operational Test and Evaluation

Our experience with JT&E began shortly after ITS was formed. We provide all aspects of Joint Test requirements including Test Site analysis, test/exercise planning, scenario development, modeling and simulation, range coordination and all forms of analysis. We also provide subject matter expertise and analysis covering Joint Doctrine Situational Awareness and Test Architecture. These are critical capabilities required to build, execute and assess test plans.

- o Joint Test Processes
 - Planning & execution for integrated and robust T&E programs
 - Operations Research/Systems Analysis (ORSA) support
 - Proven expertise in Modeling and Simulation (M&S)
 - Critical testing and evaluation of DOTMLPF-P and CBA's
- o Unmanned/Remote Piloted Aircraft Expertise
 - Operational Expertise
 - Network/Communications Expertise
- o Security Services
 - Network Security with ISSO/ISSM support
 - Special Security Officer (SSO) Support

About ITS
